

Mansfield Announces Three-Year Fixed Rate For Electric Aggregation Customers

The City of Mansfield has fixed a price for residents and businesses participating in its electric aggregation program for the next three-years at a rate of 4.915 cents/kWh with Dynegy. The new pricing will begin July 2019 and continue through July 2022.

The current rate is 6% off the Ohio Edison price to compare with FirstEnergy Solutions. Residents can call FirstEnergy Solutions to join the program at 866-636-3749 or online at <https://www.fes.com/content/fes/offers/ohio/mansfield.html> .

FirstEnergy Solutions will continue to be the city's aggregate program supplier until Constellation finalizes its purchase of the company. Current customers of the program with FirstEnergy Solutions do not need to take any action. Residents enrolled with other electric suppliers may still sign up.
